

BOOSTER PUMP

DESIGNED FOR ON-STRUCTURE LANDSCAPING

- Engineered for long-term reliability
- Innovative, easy to use touchscreen
- Unlimited, personalized technical support
- Remote control and monitoring available

NEBULA S E R I E S

Booster Pump Information

15-20GPM @ 80PSI with a Vertical Multi Stage Pump OR 30 - 70 GPM with @ 40 PSI with a End Suction Centrifugal Pump - motor mounted on a poly base with a VFD and includes:

- Flow Switch or NMP Insertion Flow Meter
- Pressure Transmitter
- Check Valve
- Pressure Gauge
- Variable Frequency Drive
- Stainless Steel Vertical Multi Stage Pump

100%
corrosion
resistant
components

APPLICATIONS

Pressure Boosting

Pride in Craftsmanship

- Family owned & operated for more than 45 years
- All PPS products are tested & certified for exceptional quality
- Designed, engineered & manufactured in the USA

Innovative Smart Controls

- User friendly color touch screen operation
- System redundancy throughout for 100% operational backup
- Monitor system performance and operation history from anywhere

Ships in 72 Hours/Easy to Install

- Super fast delivery— typically ships within 48 to 72 hours
- Completely assembled, pre-wired, tested and ready to install
- Forklift-ready for lifting— just place it, connect it and pump

Designed to Preserve & Protect

- Fully enclosed and protected internal electronics
- Durable marine grade aluminum enclosure construction
- Stainless steel piping

Advanced Touchscreen
For easy control and operation

NEBULA S E R I E S

DESIGNED FOR ON-STRUCTURE LANDSCAPE IRRIGATION

Architects and landscape designers who specialize in on-structure landscape development and irrigation require pump systems that are more compact, operate at lower flow and pressure rates and that are considerably more affordable than larger, industrial irrigation pump stations. To accommodate the specialized needs of the on-structure landscape industry, PPS has developed the NEBULA Series. A commercial grade irrigation pump system designed to meet the demands, specifications and budget required by on-structure architects and landscape designers nationwide.

- Compact, all-in-one, pre-packaged pump station
- Built with industry leading components and innovative technology
- Exceeds the capabilities of residential and light commercial pump systems
- Redundant safeties
- Innovative and easy to use controls
- Industrial grade parts and components
- Stainless steel pumps, piping, and sensors
- Fast turn around
- All at an affordable price
